Major Project — Week 4: End-to-End Digital Marketing Strategy

Brand: Bloom & Bare (fictional skincare/self-care startup)
Project scope: Market research, buyer personas, SEO landing page, 20+ social posts, analytics plan, paid advertising, email sequence, and strategy document.

Project files

- `digital_marketing_strategy.md` — full end-to-end strategy
- `market_research.md` — category overview, competitor landscape, SWOT, and research assumptions
- `buyer_personas.md` — three target buyer personas and customer journey
- `seo_landing_page.html` — responsive SEO-focused landing page prototype
- `social_media_calendar.csv` — 24-post content calendar
- `social_media_posts.md` — full copy/captions and creative guidance for 24 posts
- `paid_ad_campaigns.md` — Google Search/Display and Meta campaign plans with ad copy
- `email_sequence.md` — five-email nurture sequence
- `analytics_setup.md` — GA4/GTM event plan, KPIs, UTM conventions, and QA
- `performance_dashboard.csv` — sample dashboard template/data

Important notes

Bloom & Bare is a fictional portfolio brand. Research points are planning hypotheses based on broad category knowledge, not primary research or verified current competitor metrics. Performance numbers in `performance_dashboard.csv` are illustrative only. No live ad accounts, GA4 property, email platform, or backend have been connected. The signup form is a front-end prototype and does not store or send email addresses.

Publish and submit

Upload the project files to a public GitHub repository. If using GitHub Pages, set the source to the repository's main branch and root folder, then submit the published `seo_landing_page.html` URL or the repository URL, according to your course instructions.
